Hematology Board Review: Blueprint Study Guide and Q&A is a concise, outline-based study guide covering all topics that appear on the Hematology Certification Exam. The book includes all topics listed in the American Board of Internal Medicine (ABIM) blueprint as essential material for the exam and highlights topic areas that are often found on the test. For hematology and oncology fellows as well as practicing clinicians needing a refresher before taking MOC, this handy study guide provides succinct overviews of all blood disorders, syndromes and diseases with practice questions on the go. Each disorder or disease-based chapter provides the same structure for ease of use beginning with the epidemiology, and followed by the etiology and risk factors, signs and symptoms, diagnostic criteria, indications for treatment, prognostic factors, treatment recommendations, and special considerations. The authors provide the most accurate and up-to-date information, including well-established treatment regimens for a variety of blood disorders, including iron disorders, bone marrow failure syndromes, platelet and megakaryocytic disorders, hemostasis, thrombosis, and hematologic malignancies. Later chapters review other major subspecialty areas found on the exam including transfusion medicine and hematopoietic cell transplantation. With 200 board-style questions and answers with detailed rationales, Hematology Board Review is the go-to, quick review for any trainee preparing for initial certification and for hematologists or oncologists preparing for recertification. Key Features: Includes 200 board-style questions and answers with rationales Provides key point summaries of each topic area for quick study and easy recall Thorough coverage of hematologic malignancies, blood disorders, transfusion medicine, hematopoietic cell transplantation, and standard treatment regimens Tables providing key data and information related to staging, treatment options, and disease classifications

Whether you want to make an extra \$100 a month or an extra \$10,000, the high-level process is the same: Someone has to buy what you're selling. The money has to come from somewhere, right? (Hint: it comes from customers.) Sadly, there's an epidemic going around. The reason most entrepreneurs, wannapreneurs, and side hustlers fail is a lack of customers. If you've ever failed in your own efforts to start a business or earn money on the side, I'm guessing that was the root cause. On top of that, you're in a constant battle of not having enough hours in the day and you don't know where to focus your limited time, energy, and money. That's the bad news. The Answer The good news is you have more opportunity today to earn income in your spare time than ever before. And you don't need a killer new business idea or millions of dollars in startup capital to do it. The good news is there isn't a shortage of customers. They're out there! This book will share specifics on how to increase your earning power on your own time, on your own terms, and without getting another job. We'll look at real-life examples of people just like you making it happen. I'm going to arm you with dozens of income-generating ideas that don't require a ton of time or money to get started. And spoiler alert: there are no get-rich-quick schemes inside. Instead, you'll learn proven strategies for tapping into the growing peer-to-peer economy to supplement your income, diversify your revenue sources, and reduce your reliance on your day job for your livelihood. Go Where the Cash Is Already Flowing Buy Buttons focuses on marketplaces that already exist, where you can put your expertise, time, and assets up for sale or rent. There are hundreds of platforms that you can add your "buy buttons" to. You don't have to build a customer base from scratch, design a website, or even worry about payment processing. Each platform already has an eager audience of buyers looking for what you have to sell. Not sure what to sell? In the 300+ platforms featured inside, you're bound to find an idea or two that's a fit. These platforms are the "gateway drugs" of entrepreneurship. They're easy to get started on, to get the high from your first sale, and to keep coming back for more. Does It Really Work? I've used the same "buy buttons" marketplace strategy over and over again for the last 15 years as an entrepreneur. Even more exciting, thousands of SideHustleNation.com readers and Side Hustle Show listeners just like you are already seeing results by implementing the strategies in this book. The common thread is they set up their businesses on pre-existing platforms that made it easy for buyers to find them and spend money with them. This book will show you exactly where and how to set up your "buy buttons" to generate hundreds or thousands of dollars a month in side income. My Guarantee I guarantee you'll find at least one "buy button" platform that you can use to generate your own job-free income stream. If you don't, just send me a note (my contact info is at the end of the book), and I'll buy the book back from you, no questions asked. Now, where else are you going to find a deal like that? Ready? Hit the Buy Now button and let's get started!

How to leave behind our unwieldy, gas-guzzling, carbon dioxide-emitting vehicles for cars that are green, smart, connected, and fun. This book provides a long-overdue vision for a new automobile era. The cars we drive today follow the same underlying design principles as the Model Ts of a hundred years ago and the tail-finned sedans of fifty years ago. In the twenty-first century, cars are still made for twentieth-century purposes. They are inefficient for providing personal mobility within cities—where most of the world's people now live. In this pathbreaking book, William Mitchell and two industry experts reimagine the automobile, describing vehicles of the near future that are green, smart, connected, and fun to drive. They roll out four big ideas that will make this both feasible and timely. The fundamental reinvention of the automobile won't be easy, but it is an urgent necessity—to make urban mobility more convenient and sustainable, to make cities more livable, and to help bring the automobile industry out of crisis.

"The complete technical manual and troubleshooting guide for motorhomes, travel trailers, fifth wheels, folding campers, truck campers, and vans"--Notes.

A critically acclaimed tearjerker from a master storyteller: On one side of the border is brutality and heartache; on the other side--a new life. 14yo Manny is an orphan in Juarez, Mexico. He competes with his bigger, meaner rivals for the coins American tourists throw off the bridge between Texas and his town. Across that heavily guarded bridge await a different world and a better existence. On the night when Manny dares the crossing--through the muddy shallows of the Rio Grande, past the searchlights and the border patrol--the young man encounters an old stranger who could prove to be an ally or an enemy. Manny can't tell for certain. But if he is to achieve his dream, then he must be willing to risk everything--even his life.

Lazy days . . . steamy nights . . . and sweltering guys with rippling muscles doing what they do best . . . Luscious by Lori Foster Bethany Churchill just quit her lousy job, dumped her lousy boyfriend and moved into a new apartment. She's not looking for love, but her hot new landlord is determined to change her mind. SWAT officer Lucius Ryder--known to the women in the building as "Luscious," much to his chagrin--is one sexy lawman, and before long Bethany is tempted to find out if he's really as delicious as his nickname. . . It's About Time by Erin McCarthy County prosecutor Trish Jones has had it with smooth-talking, under-performing suits. And though she's never had a thing for big, brawny guys, one look at Caleb Vancouver's bulges makes her think she might have been missing out. One Harley ride later they're back at her place, and she realizes that she has been missing out . . . on quite a lot . . . Wish You Were Here by Amy Garvey Photographer Mackenzie Pruitt knows exactly what she wants her future to look like, and this summer that means renovating a dilapidated shed into a studio. But when hunky carpenter Leo Dawson shows up, she'd much rather have his capable hands on her than on a hammer. He's not the kind of guy she always thought she'd fall for, but when he touches her, she can't imagine wanting anyone else . . .

Overcome Common Tech Misconceptions! Just as a single “flipped bit” in a piece of computer code can bring an otherwise reliable app crashing to a halt, a single misconception in your understanding of personal computing technology can cause all manner of problems—including lost data, wasted time, and frustration as you live and work in today’s increasingly digital world. In this unique title, which is packed with little-known facts and debunked beliefs, tech expert Joe Kissell untangles common confusions surrounding the high-tech products and services we all rely on every day. By eliminating your tech misconceptions, you’ll: * Avoid common errors that waste precious time or result in data loss. * Make decisions based on an accurate understanding of how things work. * Find yourself asking for—or paying for!—computer help less often. * Have clear explanations on hand when others ask you for help. * Better understand tech topics in the headlines—encryption, passwords, privacy, and more. * Make a stronger impression at a job interview, user group, or wherever your tech skills may be judged. Some of the 16 chapters in this 190-page book are updated and expanded versions of essays originally published in TidBITS. You’ll start thinking more clearly about: • Trust: Can you trust an online service like iCloud or Gmail, or a password manager? • Privacy: How do you evaluate your privacy when a Web site wants you to give it personal information? What if the site wants to track the way you use it? What if you want to store confidential data on it? • Fear: Should you worry about using Java or JavaScript, two computer languages that have little in common except their names? • Clicking: Why click twice when you can click once? Sort out once and for all what a single click versus a double click can accomplish rather than just clicking randomly like a teenager. • Opening apps: Are you in the shockingly large group of people who spend too much time on the mundane action of opening apps? • Cloud accumulation: How many cloud services (like Dropbox or Google Drive) do you need, where are your “cloud” files actually kept, and how can you keep your monthly cost down? • Email: How can you ensure that attachments make it through? Do you worry about where your email is actually located? Did you know you can choose an email address that will work over time and make you look better online? • Backups: Are you relying on a backup strategy that will let you down? Should you worry about what happens if you start up your Mac from a bootable duplicate? • Encryption: Do you understand why the U.S. government is going after the giant tech companies, and why the stakes are high for your own use of encryption? • Passwords: Do you know why it’s such a bad idea to use the same password for multiple sites, or to rely on a pattern? (Please, please, use a password manager.) • Web: Are your web searches finding what you want quickly and easily? Did you know that you can navigate the web more effectively if you understand how URLs work?
